

CineSat being ported to latest Ubuntu 20.04 LTS

2022-01-16

The CineSat spring release 2022 will run on all RedHat- and Debian-based systems.

After some irritation introduced by recent RedHat-based distributions, we are currently porting CineSat also to the Debian and Ubuntu Linux world.

We have selected the **Zorin OS 16 Pro** operating system as a very convenient development platform for Ubuntu software - and a perfect Linux replacement for all Windows-based desktops.
